Project Name:

## **DU Tutors** - Connecting DU Students with Guardians for Tuition Opportunities

Project overview:

**DU Tutors** is an online platform that connects Dhaka University students with guardians seeking tuition. Students can create profiles to showcase their teaching skills, while guardians can post tuition needs. Features include real-time messaging, personalized search filters, and a rating system. Built with the MERN stack, it ensures smooth user authentication, post management, and easy navigation for finding the perfect tutor.

---

# Core Features

- User Authentication
  - Student Registration
  - Guardian Registration
- Profile Management
  - Student Profiles
  - Guardian Profiles
- Search and Filter System
  - For Students
  - For Guardians
- Post Management
  - Student Posts
  - Guardian Posts

---

## Additional Features

- Application and Approval System
- Rating and Review System
- Notification System
- Favorite/Bookmark Feature

---

## Optional Advanced Features

- Location-Based Search
- Admin Panel
- AI-based Matching
- Favorite/Bookmark Feature

---

# Development Technology & Tools

- Frontend: React
- Backend: Node.js + Express
- Database: MongoDB

---

# Questions

- Which collaborative tools will be good for us?
- Is our project feasible for a short time period of 3-4 months?
- How can we reach this event's ending with a good impression?
- How can we effectively differentiate ourselves from other competitors?
- What will be our communication medium?

Thank You
